## Adding, Trading, Writing Journal Prompt

Amy is outside doing her math homework but her pencil broke, so now she has nothing to write with. She had been using base 10 blocks at school to help her add fractions. Draw a picture to show how she could use leaves, sticks, and pebbles to add her last set of fractions,  $\frac{5}{10}$  and  $\frac{19}{100}$ . Write at least 2 equations to represent her situation.
