If You Hopped Like a Frog Homework

Solve each multiplicative comparison below using a 2 column table, a tape diagram/bar model, or another strategy discussed in class.

1. A crane's height is 3 times bigger than the length of its neck. If the crane's neck is 9 inches, how tall is the crane?

2. A chameleon's tongue is half the size of its body. If the length of the chameleon's body is 24 inches, how long is its tongue?

3. A shrew can eat 3 times its weight in food. If a shrew weighs 5 grams, how much food can it eat in grams?
