More Solving Situations

1. The soccer club is going on a trip to the national tournament. The cost of attending the trip is $1,063.

- Included in the price is $453 for food

    And . . .

- The cost of 5 tickets to different soccer games.

Write an equation representing the cost of the trip.

How much is the price of one ticket.

2. The soccer club raised 3 times more than the money they needed to go on the trip.

Write an equation to represent the money raised.

How much money did they raise?
