Multiply Fractions with Whole Numbers

Directions: Using a model and/or repeated addition, solve each problem below.

1. John practiced piano 5 days this week. He practiced ¾ of an hour each day.

   How many hours did John practice piano this week?_____

2. Sheila watched episodes of her favorite shows on Saturday and Sunday.
   - On Saturday, she watched 12 episodes of a show. Each show lasted 3/6 of an hour.
   - On Sunday, she watched 5 episodes of another show. Each show lasted 5/6 of an hour.

   If this was the only television Sheila watched, on which day did she watch more television?
   _____
